

THE CROWN OF THE CITY

The tower is one of the most important symbols of the city and is located behind the Government office, on the Sarayüstü Hill.

The tower as the crown of Cumhuriyet Square surrounded by buildings from the Second Abdulhamid's period, was made by Governor Abdurrahman Pasha in 1885. As it is in other cities, a ringing, big watch was demanded in Kastamonu and was ordered to İstanbul. The watch was placed on the hill known as Sarayüstü at that time, inside the 13 meter tower with a sign "Brunberger Fr.s/Strasburg 1885" and was opened with a festivity.

The taste of a glass of tea where you'll taste at the tower will merge with the unique view of Kastamonu, and you'll experience unforgettable memories.

THE CLOCK TOWER
